

CHETHAN P

Junior Developer | Application Support & Troubleshooting | SQL, Python, REST APIs | Full Stack (MERN)
Bengaluru, India | 6361652311 | chethanpashupathy@gmail.com | linkedin/chethan.p | github/chethan-456

PROFESSIONAL SUMMARY

BCA graduate (CGPA 9.63) with hands-on experience in building, debugging, and deploying web applications, working with SQL databases and REST APIs, and building real-time system monitoring. Comfortable following documented processes, writing clear documentation, and sharing knowledge with teammates. Quick, structured learner seeking a Junior Developer (Tier-1 application support) role to grow into ownership of production support and operational tasks.

TECHNICAL SKILLS

- **Languages & Databases:** SQL, MySQL, MongoDB, Python, JavaScript (ES6+); Firebase, Supabase
- **Support & Troubleshooting:** Debugging and issue troubleshooting, API testing (Postman), application and system-health monitoring concepts, technical documentation
- **Data & Reporting:** Power BI, data visualization and modeling with Pandas
- **Web & Backend:** Node.js, Express.js, REST APIs, WebSockets, React.js, HTML5, CSS3
- **Tools & Practices:** Git, GitHub, VS Code, Vercel; Agile/version-controlled workflows, API design

EDUCATION

Seshadripuram Degree College, Bengaluru

2023 – 2026

Bachelor of Computer Applications (BCA) — CGPA: 9.63

EXPERIENCE

Instruction Specialist — Pi Jam Foundation, Karnataka

Sep 2026 – Present

- Support Pi Jam Foundation's educational initiatives and programs, working within defined organizational processes, policies, and documented job responsibilities.
- Apply technical knowledge and clear communication to support learners and program delivery, building on prior experience running web development workshops.

Frontend Developer Intern — Gnana Computech Pvt Ltd

Mar 2026 – Apr 2026

- Worked as a front-end developer on EDU-Sync, an education management platform built on the MERN stack, developing responsive, reusable UI components with React.js.
- Integrated React components with Node.js/Express REST APIs and MongoDB-backed data, collaborating with the team to improve page performance and usability.

Freelance Full-Stack Developer — NxtGateSemi

- Built a fully functional website for a semiconductor training provider, handling end-to-end course registrations for programs such as VLSI.
- Delivered a responsive, production-ready site independently, from requirements gathering through deployment.

Freelance Web Developer — National School of Chess

- Designed and developed a responsive website showcasing programs, events, and coaching details, with optimized performance across devices.
- Implemented interactive features including registration forms, event highlights, and contact modules; deployed and maintained the live site.

PROJECTS

CKCOS — Cognitive Coding OS — React, Node.js, MongoDB, WebSockets, AI

- Designed a performance monitoring module to track system health and application metrics across the platform in real time, giving visibility into issues as they occur.
- Architected a 12-module cognitive coding platform bringing together a real-time collaborative code editor, knowledge graph, AI assistant, live chat, and performance monitoring in a single system.
- Built a WebSocket-based live collaboration engine enabling multiple users to edit and sync code simultaneously with low-latency updates.
- Developed a knowledge graph module to map code relationships and dependencies, and integrated AI-assisted features alongside a live chat page for real-time team communication.

INCOGNITO 2026 — Technical Fest Website — HTML, CSS, JavaScript, Supabase

- Built the official website for Seshadripuram College's intercollegiate fest, covering event details and live participant registration.
- Implemented an interactive UI with a countdown timer and smooth navigation for better UX.
- Integrated Supabase authentication and a real-time database to securely manage registrations.

Quiz Web Application — HTML, CSS, JavaScript

- Built a responsive, timer-based quiz app with automatic scoring, dynamic questions, and auto-submit on timeout, using modular, well-documented code.

CERTIFICATIONS

- **CS50P — Introduction to Python Programming (Harvard/edX):** functions, loops, conditionals, file I/O, testing, final project
- **Web Development** — Front-end fundamentals with HTML, CSS, and Firebase; built responsive, interactive interfaces

LEADERSHIP & ADDITIONAL INFO

- **Secretary, National Service Scheme (NSS)** — led team initiatives and fostered collaboration across student volunteers; conducted web development workshops and mentored juniors, sharing technical knowledge and supporting their learning.
